CASE STUDY

WEB APPLICATION SECURITY AUDIT

GLOWTRACK AUCTIONS

A critical authentication bypass — caught and patched before the platform ever went public.

CHALLENGE

A Harare auction platform needed assurance its web application was safe before going public.

WHAT WE FOUND

A critical unauthenticated API endpoint allowed an authentication bypass — among 6 issues in total.

OUTCOME

Patched before public launch, with a full remediation report.

THE RESULT

6 VULNERABILITIES FOUND · CRITICAL AUTH BYPASS FIXED · LAUNCHED SECURELY
